Date: 5th September 2016

Dear Sirs,

This letter is to confirm that the Talc Filled PP we have supplied to us is reprocessed injection grade based on 100% recycled plastic.

The product is based on post industrial bumpers and Talc Filled PP post industrial products which are then mixed in a 5 tonne blender to give a uniform product.

All the materials are bought in by our supplier and are then shredded, granulated, compounded and then go through a series of metal detectors.

We also add that even the 1 tonne bulk bags which the material is supplied in have been recycled and can be recycled again.

Kind Regards

A handwritten signature in black ink, appearing to read "David Wright", is written over a horizontal line.

David Wright
Sales/Operations Manager
