## IMPROVED TEST RESULTS

The New Era acoustic cradle was tested at AIRO on the 26th February 2019 for impact sound insulation for compliance with Robust Details Ltd requirements as stipulated in the Robust Detail Handbook for FFT2 Resilient Cradle and batten system.

### TEST 1

Ref L/3460/2 was with the 16/30mm cradles using a 36mm batten (average floor height 74-80mm) Result was **27db sound reduction**

### TEST 2

Ref L/3460/3 was with 45/60mm cradle using a 46mm batten (average floor height 136-138mm) Result was **28db sound reduction**
