

NEW ERA SPORTS FLOOR SOLID OR ENGINEERED

BATTEN

PACKER

SPORTS CRADLE

Gymflex Active is a high performance hardwood floor system with a height range of 74-350mm using the unique New Era sports cradles and suitable for gym and fitness areas up to 350m<sup>2</sup> or below. The additional structural supports provides extra strength to allow more surface loading and impacts, whilst still offering the sprung floor standard and excellent acoustic isolation needed when used on upper levels.

Gymflex Active can be supplied in either solid beech or engineered beech or oak floor finishes and used in conjunction with Gymflex Puzzle lock tiles on top, will provide areas for free-weights to protect the surface finish

Floor Height	Performance	Floor Type	Batten Centres	Floor Dimension	Max floor size	Substructure	Weight Limit	Sustainability	Acoustic
74-350mm	BSEN 14904 Part A3	Solid Beech	336mm	22 x 129 x 1830mm	600m <sup>2</sup>	NewEra sport cradle & battens	350kg point & 500kg static Load (M2)	FSC	25db Reduction
74-350mm	BSEN 14904 Part A3	Engineered Beech or Oak	220mm	21 x 215 x 2200mm	600m <sup>2</sup>	NewEra sport cradle & battens	350kg point & 500kg static Load (M2)	FSC	25db Reduction
