

BEECH GYMFLEX 21mm LAYERED

Style Chart

Dimension

Available in two sizes: 21mm x 215mm x 2200mm

Grade *Clarity*

Finish

Silk Matt Lacquer

Beech is one of Europe's most common hardwood species, which is fully sustainable, hard wearing and has a uniform grain pattern with excellent strength properties. The unique and warm and darker tones of Gymflex Beech Layered adds a stylish and modern solution for floors, whilst still delivering the same high performance required for the most challenging of activities.

Gymflex Beech Layered flooring is produced and categorised in accordance with En13629, En14904, ensuring the highest standard for sports use. The graining and knots are characteristics for this type of natural wood and grade.

The image shows the average appearance of the grades. It is normal to see a variation in appearance between individual floor boards and across staves.

Hardwood floors may fade or change colour slightly over time due to the effect of natural uv light, particularly if kept in direct sunlight.

BEECH GYMFLEX LAYERED GRADING

Clarity

This grade has a natural appearance with smaller knots and less variation in colour, creating a more uniform floor which has been selected to enhance the true beauty of the timber.

The actual colour on a wooden floor can vary from the colour shown in this chart. This is due to the fact that colours are very difficult to reproduce online and in printed material

New Era accepts no liability to discrepancies and we always recommend ordering a physical sample before placing an order.
