

## LVT FLOOR MAINTENANCE

### INFORMATION

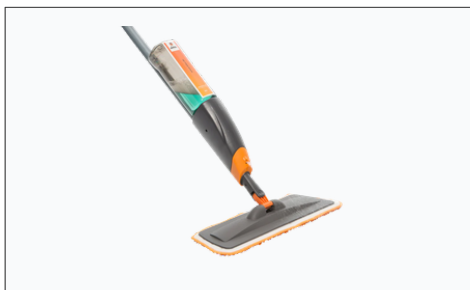

New Era LVT Flooring is a high-performance sports surface designed for durability and longevity. To maintain its superior finish and extend its lifespan, we recommend following these care guidelines.

### LVT CLEANING

It is important to clean LVT frequently to keep the floor surface performance and recommended daily sweeping or vacuuming that are in everyday use.

<b>Daily Cleaning</b>	Thoroughly sweep or vacume to remove all loose grit and dirt.
<b>Cleaning every 1-2 weeks</b>	Use NE clean solution to remove ingrained dirt and grime using NE mop or similar alternative mops with well rung out cloths.
<b>Deep Clean every 6-12 months</b>	Clean floor with NE Clean solution and gently scrub the surface with soft brush or mechanical scrubber. Clean on completion with mop to remove any residue.

### NEW ERA SPRAY MOP KIT

The New Era Sprey Mop Kit is designed for removing dust, dirt & grime using the specifically combined cleaning formulas or can use a diluted cleaner of choice to suit the floor finish. The sprey mop is easy to use and is rince and streak free, therefore no need for buckets of water and cleaning cloths. Supplied with a machine washable microfiber pad, the mop will help to remove 99.9% of bacteria on all hard serfaces to make a nice, clean and safe floor every time.

### NEW ERA NE CLEAN

New Era NE Clean is a multi purpose everyday cleaner designed to dissolve surface dirt that dries quickly and not leaving a film on the floor. With a mop or mechanical floor cleaner, ensure a minimal amount of water is in contact with the floor. When using mops it is essential to ensure it is always well wrung out and kept clean.

**Dilute:** 50-100ml/10 litres of water
